Lifeboat Proudly Wears the Ribbon: Tucows Awards Editor's Choice to Lifeboat Data Rescue

(Powell River) – FOR IMMEDIATE RELEASE – Tugboat Enterprises Ltd is celebrating the receipt of the Tucows Editor's Choice award for *Lifeboat Data Rescue*. This award comes in addition to being listed as a "Must Have Application" by Tucows in December 2005.

"We are extremely proud of this award," CEO Judi Tyabji Wilson said, "Tucows is well respected and highly considered for its independent reviews of software. Tugboat Enterprises prides itself in the development of software that is highly reliable and easy for non-technical people to use. It's great to have this recognized by such a prestigious company."

Lifeboat Data Rescue was first introduced to the market in May of 2005 and has proven itself to be a valuable asset to laptop, notebook and PC users.

"These two distinguished awards will help give our product increased credibility in the marketplace," Said Jonathan Lyster, Chief Technology Officer. "The greatest hurdle that software developers have is overcoming the cynicism that exists amongst potential buyers. There are so many programs that don't do what

they claim to do. It is critical to have validation from an independent authority such as Tucows."

Tucows www.Tucows.com is an internet services company that provides services to a global network of more than 6,000 web hosting companies, internet service providers (ISPs) and other service providers worldwide. It is the original software download site, hosting more than 40,000 software titles, all tested, rated and reviewed by their editorial staff of software experts. Tugboat Enterprises is a quickly expanding software development company based in Powell River, British Columbia. Their other products include *Nauticus Deep Data Storage*, and automated off-site storage program, *Coracle Data Transfer* and *The Hook Freeware*. Visitors can enjoy the view from their office that looks onto the Malaspina Strait in the Pacific Northwest through Tugboat's *Window on the Middle of Nowhere* at www.TugboatEnterprises.com

TUCOWS Must Have Applications - Lifeboat by Dr. File Finder™ December 22, 2005

Lifeboat saved me hours of work.... The Lifeboat Data Rescue System is brilliantly simple... Lifeboat can save your files even if the operating system has failed! I haven't seen another program that can make that claim... Lifeboat, by Tugboat Enterprises, Ltd., is in my opinion a program that should be included with every computer... Because you never know what will trigger the crash... Lifeboat ... (has) become what I consider to be a true must have application!

If you don't buy the program now, at least bookmark this page in case you need Lifeboat in the future. The builders of the Titanic said it was unsinkable and didn't install enough lifeboats. They were wrong and it cost the passengers everything. If you have a crash, make sure you have a LifeBoat!
