Tugboat Enterprises Airs *Lifeboat* on National Television

For Immediate Release - Tugboat Enterprises' Chairman and President Gordon Wilson will appear on *World Business Review* in studio with former U.S. Secretary of State Alexander Haig tonight Thursday May 24th on CNBC at 11:30 pm (as paid programming). The show will focus on *Lifeboat Data Rescue*, the first of five products that the company is now taking to the international marketplace.

Tugboat Enterprises is a bullish start-up software development company that focuses on data management and data recovery. The company is moving aggressively to full commercialization of *Lifeboat Data Rescue*. This product is designed to by-pass a non-functional Windows operation. With only three keystrokes *Lifeboat Data Rescue* recovers all data off a crashed hard-drive.

"I am very proud of the accomplishments of this company," Wilson stated. "The timing of this program is good from both a product marketing point of view and also because we are now aggressively going into the investment market to capitalize full commercialization of our entire data management line of products."

The World Business Review studio is in Boca Raton, Florida and the program is available to companies invited to showcase their products on National Television with highly respected host Alexander Haig.

Information on the Tugboat Enterprise full product line and investor information may be found at www.tugboatenterprises.com. The World Business Review program will, in addition to the posted CNBC air time be posted within days at http://www.wbrtv.com/media_stream/vid_page.html as program #1713.

Tugboat Enterprises is a quickly expanding software development company based in Powell River, British Columbia. Other products include *Nauticus Deep Data Storage*, and automated off-site storage program, *Coracle Data Transfer* and *The Hook Freeware*. Visitors can enjoy the view from their office that looks onto the Malaspina Strait in the Pacific Northwest through Tugboat's *Window on the Middle of Nowhere* at www.TugboatEnterprises.com

TUCOWS Must Have Applications - Lifeboat by Dr. File Finder™ December 22, 2005

Lifeboat saved me hours of work.... The Lifeboat Data Rescue System is brilliantly simple... Lifeboat can save your files even if the operating system has failed! I haven't seen another program that can make that claim... Lifeboat, by Tugboat Enterprises, Ltd., is in my opinion a program that should be included with every computer... Because you never know what will trigger the crash... Lifeboat ... (has) become what I consider to be a true must have application!

If you don't buy the program now, at least bookmark this page in case you need Lifeboat in the future. The builders of the Titanic said it was unsinkable and didn't install enough lifeboats. They were wrong and it cost the passengers everything. If you have a crash, make sure you have a LifeBoat!

"If you have any concerns about your data, even if you do backups, you'll want to check out Lifeboat. It's unique and by far the best alternative to recovering data from a damaged drive... Give it a try, think you'll be amazed at how easy it is to set up and use." Don Watkins, *PC Net*, www.pcnet-online.com

"We recently reviewed the *Lifeboat* data recovery software. It's a terrific utility that everyone – and I do mean *everyone* – should have on a CD that sitting next to their Windows PC." Howard Carson, Managing Editor, *Kickstartnews* www.kickstartnews.com
