Moorage available for your Website with Tugboat Enterprises' *Dockspace*

Award-winning software developers launch new hosting program

(Powell River) – FOR IMMEDIATE RELEASE

Whether your web-business is tied to the marine industry or not one thing is certain, you don't want to launch your new website only to have it sink as a result of poor bandwidth, uncertain service, or unscheduled downtime.

Tugboat Enterprise Ltd now offers *Dockspace*, a premium, reliable web-hosting service with a **guarantee of no unscheduled downtime**. With *Dockspace*, customers will have Tugboat's renowned commitment to quality and service extended to webhosting, at some of the best prices available.

"We only want to offer our customers the best products, and the best service. With *Dockspace* we are expanding our suite to provide custom solutions for each account," Said CEO, Judi Tyabji Wilson. "We look forward to offering affordable web hosting service to small business, professionals and individuals."

Tugboat Enterprises provides a full range of data management products which include *Lifeboat Data Rescue*, *Nauticus Deep Data Storage*, *Coracle Data Transfer*, and freeware *The Hook*. *Dockspace* is provided in part through the contracted services of Rackspace who are principal providers for Tugboat Enterprises on-line sales of their highly successful Data management product line.

Lifeboat Data Rescue is quickly becoming the preferred software for fast and efficient data recovery when Windows stops functioning. The software was recently awarded the Tucows Editors Choice Award, and has received numerous five star reviews.

TUCOWS Must Have Applications - Lifeboat by Dr. File Finder™ December 22, 2005

Lifeboat saved me hours of work.... The Lifeboat Data Rescue System is brilliantly simple... Lifeboat can save your files even if the operating system has failed! I haven't seen another program that can make that claim... Lifeboat, by Tugboat Enterprises, Ltd., is in my opinion a program that should be included with every computer... Because you never know what will trigger the crash... Lifeboat ... (has) become what I consider to be a true must have application!

If you don't buy the program now, at least bookmark this page in case you need Lifeboat in the future. The builders of the Titanic said it was unsinkable and didn't install enough lifeboats. They were wrong and it cost the passengers everything. If you have a crash, make sure you have a Lifeboat!

"If you have any concerns about your data, even if you do backups, you'll want to check out Lifeboat. It's unique and by far the best alternative to recovering data from a damaged drive... Give it a try, think you'll be amazed at how easy it is to set up and use." Don Watkins, *PC Net*, www.pcnet-online.com

"We recently reviewed the *Lifeboat* data recovery software. It's a terrific utility that everyone – and I do mean *everyone* – should have on a CD that sitting next to their Windows PC." Howard Carson, Managing Editor, *Kickstartnews* www.kickstartnews.com
