Lifeboat Version Two Earns Top Marks

Innovative Data Recovery Recognized by PCNet-Online

FOR IMMEDIATE RELEASE – Version two of the award winning data retrieval program *Lifeboat Data Rescue* has just been launched by Tugboat Enterprises Ltd and it is getting high praise from industry leaders like PCNet-Online.

Don Watkins, who gave top billing to *Lifeboat Data Rescue V1.1* writes in PC Net, "Version 2.0 has been released and I'm even more impressed". Watkins, a veteran software reviewer, commented: "I was pleased to find that 2.0 was a genuine improvement with updates to the core functions rather than adding new graphics or changing the wrapper."

Notable in the numerous changes to the Data Rescue program is the installer. Version 2.0 of *Lifeboat Data Rescue* provides a phenomenal improvement to the method of creating your *Lifeboat* CD. The installer adds a Windows interface to the process of creating your recovery CD. It places a folder in your start menu, which includes a CD-writing utility, the *Lifeboat* Navigator's Manual, and a quick-start guide to *Lifeboat*.

"*Lifeboat* is designed to be a simple means for recovering data from a failed computer. Anywhere we can simplify and improve the process of creating your *Lifeboat* CD or of booting to *Lifeboat* is where we focus our resources," said Jonathan Lyster, Chief Technology Officer for Tugboat Enterprises.

"We are delighted with the response to *Lifeboat Data Rescue* V.2," commented Nathan

Potechin, V.P. sales. "We are currently reworking our web site and plan an aggressive sales campaign early in the New Year, so this product's release and the wonderful response to it is very timely."

TUCOWS Must Have Applications - Lifeboat by Dr. File Finder ™

Lifeboat saved me hours of work…. The Lifeboat Data Rescue System is brilliantly simple... Lifeboat can save your files even if the operating system has failed! I haven't seen another program that can make that claim… Lifeboat, by Tugboat Enterprises, Ltd., is in my opinion a program that should be included with every computer… Because you never know what will trigger the crash… Lifeboat … (has) become what I consider to be a true must have application!

If you don't buy the program now, at least bookmark this page in case you need Lifeboat in the future. The builders of the Titanic said it was unsinkable and didn't install enough lifeboats. They were wrong and it cost the passengers everything. If you have a crash, make sure you have a Lifeboat!

"If you have any concerns about your data, even if you do backups, you'll want to check out Lifeboat. It's unique and by far the best alternative to recovering data from a damaged drive… Give it a try, think you'll be amazed at how easy it is to set up and use." Don Watkins, *PC Net*, www.pcnet-online.com

"We recently reviewed the *Lifeboat* data recovery software. It's a terrific utility that everyone – and I do mean *everyone* – should have on a CD that sitting next to their Windows PC." Howard Carson, Managing Editor, *Kickstartnews* www.kickstartnews.com
