Selkie Magic Tops Harry Potter

Real Software Magic Trumps Movie Special Effects

July 12, 2007

For immediate release – With movie goers all agog at the fictional magic of Harry Potter's latest feats in *Order of the Phoenix* more and more PC owners are cheering the magical way that the latest version of *Selkie Rescue Data Recovery*, Selkie 2.1, almost instantly recovers data trapped in a crashed and non-functioning Windows system. The most compelling feature is that the *Selkie Rescue Data Recovery* system is real and not fiction.

Selkie Rescue 2.1 is the latest version of the award winning data recovery software released by Tugboat Enterprises Ltd. www.SelkieRescue.com its ability to self-boot within a non-functioning Windows system provides for very fast and very safe data recovery saving PC and Laptop owners hundreds of dollars in service costs.

"I am always curious at the fascination that people have for the fictional world of magic and doing the impossible," Board Chairman Gordon Wilson said. "This fascination has made the Harry Potter books and films top money earners. The latest Potter film based upon J. K. Rowling's book *Harry Potter and the Deathly Hallows* will no doubt thrill Potter fans. The new *Selkie Rescue 2.1* will thrill people who find their files trapped within the nasty depths of a crashed computer."

"We have been improving on this utility for over two years now," Chief Technology Officer Jonathan Lyster said, "to the point where it is, for the money, the best data recovery utility available on the market today. There is nothing entertaining about losing valuable files within a dead computer, but watching *Selkie Rescue Data Recovery* get them back is a treat all by itself."

Tugboat Enterprises is in its third year as a private software development company.

Selkie Rescue is a bootable CD that is easy to use and affordable. **Selkie** is to data rescue what anti-virus is to computer protection. **Selkie Rescue** solves a major problem faced by more than 1 billion owners of PCs and laptops - lost data due to computer crashes from viruses or bad software. Instead of sending your computer or laptop to a repair centre and losing significant time & money, **Selkie** recovers your data within 10 minutes, using 5 mouse clicks or keystrokes - all for \$99.99. **Selkie Rescue Data Recovery** does not require Windows to be functional in order to recover data.

Selkie is available at www.SelkieRescue.com for US\$99.99. Enterprise and bulk licensing is available by contacting Nathan Potechin at 1-888-688-9199.

Selkie Rescue System Requirements

Any Pentium or equivalent CPU (Intel, AMD) capable of running Windows 95 through Vista; 16MB available system RAM; VGA graphics chip and color monitor; CD-R drive and blank recordable CD required to burn the Selkie Rescue CD; any active network connected to the PC being rescued.
