"Magic Rescue Disk" Makes Data Recovery Easy
Selkie Rescue reviewed by Softonic.com

For Immediate Release – *Selkie Rescue Data Recovery* has won the prestigious four out of five stars award from Europe's leading software download portal, Softonic.com.

Reviewer James Thornton says, "*Selkie Rescue* provides a fast and reliable way of recovering your stuff when your computer gives out on you." He notes that many people think that a catastrophic computer failure can't happen to them, and that anyone who has lost something important in a devastating crash will vouch for the fact that it's vital to take precautions.

Paul Flanagan, VP Sales and Business Development says, "we're excited because this technology provides a solution to a 30-year old problem that is a quantum leap ahead of any software or consulting service currently available today. The data migration and data recovery application industry has a new paradigm and it's *Selkie Software*."

Selkie Rescue is a great thing to have on hand when the inevitable happens. "*Selkie [Rescue] Data Recovery* is designed to make the process of protecting your data quick and simple," Thornton writes. "Once you have your magic rescue disk, you're ready for

anything. If your operating system crashes you simply reboot your machine and insert the CD into the drive." To read the full review, visit http://selkie-rescue-data-recovery.en.softonic.com/.

Selkie Software products provide world-class solutions for data migration and data recovery to the Enterprise, SMB, and Home Office Markets. *Selkie Software*'s technology enables Enterprise, SMB, Government and Home Office end-users to migrate, maintain and preserve mission-critical emails, presentations, documents, photos and videos that would otherwise be irretrievable in the event of Operating System or hardware failures or when migrating data to a new desktop.

Selkie Rescue Data Recovery can bypass a non-functioning Windows operating system to recover data files with only three key strokes. It has received several industry awards and international acclaim and is quickly becoming the preferred software for fast, easy, secure data recovery when Windows stops functioning. A major upgrade to *Selkie* in version 3.5.0 was released in mid-February.
