

## **Dataline to Present at 2<sup>nd</sup> International Cloud Computing Conference and Expo in New York City**

Dataline cloud computing thought leader, Kevin Jackson, will be presenting at SYS-CON's [2nd International Cloud Computing Conference & Expo](#) in New York City this coming March 30-April 1, 2009. Jackson, a former IBM Worldwide Sales Executive, will be presenting on the Federal Government's view of cloud computing.

During the transition period, members of President Barak Obama's Technology, Innovation and Government Reform Team stated that the shift to cloud computing would represent one of the most important transformations that the Federal government will go through over the next 10 years (<http://tinyurl.com/8rjdf6>). The U.S. Defense Department's Defense Information System Agency is, in fact, already fielding a cloud computing infrastructure.

In October 2008, through on-line surveys and in-depth interviews, customer requirements and concerns were gathered in order to shed light on current cloud computing offerings targeted for government customer. The conference session will review that survey and update the audience on insights, opportunities and important trends in this market segment. Kevin Jackson was recently a guest on the nationally syndicated National Public Radio "All Things Considered" where he discussed cloud computing and how it could be used by the Obama administration (<http://tinyurl.com/989mtj>). Mr. Jackson is also an author and contributor to the SYS-CON Cloud Computing Journal.

Dataline, recently named as a "Top 100 Cloud Computing Company" (<http://tinyurl.com/86hzh6>) is a leading transformational technology solutions provider to Department of Defense (DoD) and federal customers. In partnership with our customers, we are accelerating the rate of change in the DoD's transformation to Net-Centric Warfare and progressing America's capability for total Information Dominance. We exist to serve the men and women of the US military and federal government. We serve the information needs of the guardians and sentinels of security, freedom, and peace; and, we strive to be the most trusted and steadfast provider of technologically innovative product and service solutions that facilitate the success of their mission.
