onShore Networks Attains Authorized Education Reseller Status (AER) in the Microsoft Partner Program

Chicago, Illinois — April 17, 2009 — onShore Networks, completeIT® services, today announced it has attained Authorized Education Reseller (AER) status in the Microsoft Partner Program recognizing **onShore's** expertise and impact in the Education marketplace. As an Authorized Education Reseller, **onShore Networks** is now able to provide additional Microsoft products to its existing and growing customer base in the Education market.

onShore Networks has been providing technical IT services to the Chicago-land area since 1991. They are experienced with all facets of technology for business. The Network Integration (NI) services team is fully versed with Microsoft products they recommend and incorporate into solutions to their customers. In addition, **onShore Networks** is a full-service Internet Service Provider (ISP). They provide connectivity via T1's, T3's, OC3's, OC12's, Ethernet, and Wireless, which they manage and monitor 24x7x365, to their customers. **onShore Networks** recently upgraded their core network to an OC48 which will allow them to continue to provide the level of service their customers demand. Finally, **onShore Networks** has a full-service onGuard Managed Security Services team which allows them to provide a high level of security expertise to properly manage potential security threats to their customers networks.

"We are extremely pleased to have attained Authorized Education Reseller status in the Microsoft Partner Program. This allows us to more effectively provide product and promote our expertise and relationship with Microsoft to our customers," said Nick Valavanis, Chief Operating Officer. "The benefits provided through the Authorized Education Reseller program will allow us to continue to meet our customers needs as a one-stop-shop technology services company."

onShore Networks is a leading provider of computer network integration services to the Chicago-land area. Its expertise includes designing and implementing local and wide area networks (LANs/WANs), delivering and managing systems running Microsoft Windows, Apple MacOS X or Linux Operating Systems, network security monitoring and management including Managed Security Services, onSite technical support and internet connectivity (ISP) services. In addition to its NI and ISP business, **onShore's** Residential Technology Services (RTS) team designs, builds and manages multi-tenant data networks (MDNs), for delivery of internet connectivity, TV and phone services, in high-rise buildings.
