**onShore Networks Successfully completes Statement on Auditing Standards
(SAS 70) Type I Audit**

*Independent Audit Assures onShore Customers that Operational Processes and Controls Meet
High Standards of Security and Reliability*

Chicago, Illinois — April 17, 2009 — onShore Networks, completeIT® services, today announced it successfully completed the Statement of Auditing Standards No. 70 (SAS 70) Type I Audit of **onShore's** processes and controls. The audit was performed by a nationally recognized independent auditing firm. The successful completion of this comprehensive audit demonstrates **onShore's** commitment in implementing processes and controls for delivery of services to its customers. Included in the scope of the audit were **onShores's** onGuard Managed Security Services and Spectrum Managed Information Technology Services products.

“We are extremely pleased to have achieved SAS 70 compliance. This demonstrates our continuing commitment to provide the highest standard of service to our customers. Our documented controls and processes are now fully audited to meet the strict SAS 70 standard.” said Stelios Valavanis, Chief Executive Officer.

About SAS 70 Certification

Statement on Auditing Standards No.70 (SAS 70) is an internationally recognized auditing standard developed by the American Institute of Certified Public Accountants (AICPA). SAS 70 is the authoritative guidance that allows service organizations to disclose their control activities

and processes to their customers and their customers' auditors in a uniform reporting format. A SAS 70 examination signifies that a service organization has had its control objectives and control activities examined by an independent accounting and auditing firm. For more information regarding SAS 70 auditing, please visit www.aicpa.org.

onShore Networks is a leading provider of computer network integration services to the Chicago-land area. Its expertise includes designing and implementing local and wide area networks (LANs/WANs), delivering and managing systems running Microsoft Windows, Apple Mac OS X or Linux Operating Systems, network security monitoring and management and onSite technical support and internet connectivity (ISP) services. **onShore Networks** employs a full-service onGuard Managed Security Services team and Spectrum Managed IT Services team. The onGuard team provides a high level of security expertise to properly manage potential security threats to their customers networks. The Spectrum team performs remote management and maintenance of servers, workstations and network equipment of their customers. In addition to its NI and ISP business, **onShore's** Residential Technology Services (RTS) team designs, builds and manages multi-tenant data networks (MDNs), for delivery of internet connectivity, TV and phone services, in high-rise buildings.
