

SignatureTM Lite

**An Ounce Of Prevention
Is A Pound Of Cure**

Data Security

In today's increasing mobile world where critical and confidential data are stored digitally, one cannot deny that data security is an important yet overlooked issue in many environments. On many occasions, cumbersome restrictive techniques and expensive deployments are typical reasons for data security to be compromised.

Ease Of Use

Signature Lite is equipped with unique and patented fundamentals such as unique and patented dual fingerprint recognition and authentication, truly driverless, zero footprint, password-free and cross platform compatibility; effectively ensuring users and administrators spend more time using the solution instead of exploring its features.

Encryption Methodology

Signature Lite employs a robust hardware cryptographic engine that performs strong hardware AES-128bit encryption and decryption of your data on the fly without the need of any software or application.

Enhanced Security Protection

In addition, enhanced security protection including power management, entry guard, temper protection, on-board fingerprint processing and recognition.

SignatureTM Lite

**An Ounce Of Prevention
Is A Pound Of Cure**

Specification

Interface: USB 2.0 and backward compatible with USB 1.1
Data Transfer Speed: Read speed up to 24MB/s; Write speed up to 16MB/s
Dimensions: 77mm (L) x 28mm (W) x 13mm (H)
Weight: 30g
Capacity: 2GB / 4GB / 8GB
Crypto Standard: AES-128bit

Features

Compact and light
Easy to install and use (Plug and play via USB port)
Biometric security prevents unauthorized access to data
On-board fingerprint processing and authentication
No external power supply
OS support: All Windows (including Vista and new Windows 7), Mac OS 9.2 or higher, Linux kernel 2.4x or higher
