z.Find

Find Data; Fast and Easy

With z.Find you can now access information in your ERP faster and more efficiently than ever before. Simply type in a search term, select your landing page and get your answer. Finding ERP data has never been so easy.

One Search, Multiple Systems

In a single search, z.Find can return information that resides in multiple databases, in tables from third party add-ons or from customized tables. No longer does a user have to navigate multiple applications to find information; z.Find is the central search tool for all of your organizations business information.

- ► Sage MAS 500 ERP
- ► Sage MAS 90/200 ERP
- ► Sage SalesLogix
- ► Sage Accpac ERP
- ► Third Party Applications and Customizations

Information is key to your organization, find it faster and easier than ever before.

► ADVANTAGES

- **Search How You Are Used to Searching.**
  Google-type search.

- **Super-Fast Searching.**
  Information is searched and returned in milliseconds.

- **Search Multiple Databases.**
  If your ERP has multiple databases, z.Find can bridge the gap between the databases and display results from multiple sources.

- **Drill In.**
  Find the information the user is searching for, then with a click of a mouse you can launch the ERP screen with all pertinent data pre-loaded.

- **Easy to Purchase, Deploy and Manage.**
  z.Find is easy to purchase and deploy through the z.AppStore and once installed requires no additional management.
