onShore Networks Announces the Opening of Their New Data Center Facility in Downtown Chicago

Chicago, Illinois — June 30, 2010 — onShore Networks, completeIT® services, today announced it has completed construction of its new Data Center facility in downtown Chicago. The Data Center is centrally located at 216 W. Jackson Boulevard. The new facility greatly expands **onShore Networks'** footprint for colocation space. The facility measures 3000 square feet and was built with all the amenities **onShore Networks'** colocation customers require. The Data Center includes raised flooring, provides 24x7 climate control through data center grade air handling units and provides electrical power redundancy through a combination of Uninterruptible Power Supplies and diesel back up power generator.   **onShore Networks** will offer customers a variety of colocation space options including 1-4 rack units, 1/3 rack, 1/2 rack, full rack or multiple racks. There are multiple options for electrical power and bandwidth within each rack. More details on service can be found here: http://www.onshore.com/colocation.

onShore Networks has chosen three major and diverse internet carriers for their upstream connectivity. In addition, **onShore Networks** will continue to offer aggressively priced internet connectivity services, with even better overall service, to their commercial ISP customers.

- more -

onShore Networks has been providing technical IT services to the Chicagoland area since 1991. They are experienced with all facets of technology for business. The Network Integration (NI) services team is fully versed with Microsoft products they recommend and incorporate into solutions to their customers. In addition, **onShore Networks** is a full-service Internet Service Provider (ISP). They provide connectivity via T1s, T3s, OC3s, OC12s, Ethernet, and Wireless, which they manage and monitor 24x7x365, to their customers. **onShore Networks** recently upgraded their core network with Load Balancing services, which will allow them to continue to offer the level of service their customers demand. Finally, **onShore Networks** has a full-service onGuard Managed Security Services team, which allows them to provide a high level of security expertise to properly manage potential security threats to their customers' networks.

"We are extremely pleased to have completed our new Data Center facility. This project was a major undertaking and our entire team handled the transition professionally and with minimal downtime to our customers. We now look forward to providing our customers an even better experience for their ISP, connectivity services, hosting and colocation needs." said Nick Valavanis, Chief Operating Officer.

onShore Networks is a leading provider of computer network integration services to the Chicagoland area. Its expertise includes designing and implementing local-area and wide-area networks (LANs/WANs), delivering and managing systems running Microsoft Windows, Apple Mac OS X, or Linux Operating Systems, network security monitoring and management including Managed Security Services, onSite technical support and internet connectivity (ISP) services.
