Miami, May 21th, 2010.

Mr. Barack Obama

Honorable President of the United States of America.

The White House

1600 Pennsylvania Ave.

Washington, DC 20500

Ref: **Gulf of Mexico Oil Spill SOLUTION**

Dear **Mr. President**,

The **oil spill of Gulf of Mexico** is an unprecedented environment disaster in our country; I would like to request your special attention to the information below, regarding the solution to clean our **Florida** beaches.

The oil spillage has already decimated the economy and the marine life of a large costal area in the **Gulf of Mexico**. This damage will continue to grow exponentially in other areas of the **Gulf of Mexico** and now is reaching the coast of **Florida**.

Our company for the last decade works in the decontamination and bioremediation problems in **Europe** and around the world, and we coincidentally have a representative in **South Florida**.

We already made tests to clean the **Florida's** Everglades of its contamination couple years ago, with total positive results in decontamination and bioremediation. All results of these tests are with **USBiosystems University of Florida**.

We respectfully request the opportunity to advise your administration on how we can help to solve this unprecedented problem.

We propose to clean the areas, the sand and the vegetation "In Site" with Biodegradable Chemicals and Biological Acceptable Products that are Environmentally Friendly to accelerate the process of Biodegradation, and we cold have our beaches back to normal in a record time.

We work direct from our factory with governments, without intermediaries.

Please find below the names and contact information for our representatives in **Florida** that can answer any technical question you or your technical team may have.

 AAA Construction & Development Corp.

Viale Andrea Doria 24, 20124 Milano, ITALIA ,Tel + 39 02 6707 0989, Fax + 39 02 6738 7833
