OVERVIEW

The Corporate Colocation Edge

Corporate Colocation partners with customers to provide reliable, secure data centers that improves business continuity and promote the growth of their ICT infrastructure.

Corporate Colocation builds and manages Green Data Centers, in Los Angeles and Dallas and will soon expand into other markets. Our innovative heat extraction technology and commitment to only the best cabinets, redundant power, cooling, infrastructure, network and security guarantees the highest level of service and support to our clients.

Added to that is our commitment to a "client centered" approach to business, where personal concern is a top priority, and demonstrated throughout the datacenter, from the amenities in the lounge including free espresso and cold drinks, to concern and care for clients – being there whenever they need us 24/7/365 with helping hands and concern.

Not only do Corporate Colocation Datacenters provide added redundancies and security, it also provides the opportunity for clients to contribute to the conservation of energy, reduction in CO2 and the resulting cost savings.

Efficiently built Green Datacenters result in reduced operating costs which are passed onto customers as savings. High client satisfaction with cost efficient rates results in high client retention and satisfaction.

Our commitment to our clients is that no matter how big we grow or expansion we will continue our commitment to innovation, conservation, datacenter amenities and personal and friendly care to our clients.

Our Offerings

Corporate Colocation Inc. has three principle product offerings: (1) Colocation, from a Full Suite, Cage to Cabinet, or Shared (Less than Cabinet).

Suites and Cages are custom built based on heating, cooling and power requirements. Cabinets are Pre-Wired "State of the Art "Chatsworth Cabinets.

(2) Bandwidth- Corporate Colocation is a "Carrier Neutral" Facility, which also provides excellent rates on the resale of Level3, and other major brands, and our high quality blend. All at competitive pricing. A cross connection matrix is prewired to all cabs and cages for rapid deployment of cross connections to bandwidth and Telco providers.

 (3) Managed Services- Corporate Colocation provides a solid team of software professional to manage client servers in Windows and Linux Based Operating Systems, including but not limited to 24/7 monitoring software updating and support up to operating system and beyond.

Customers, large and small can rely upon our team of experts to do anything from designing the most efficient deployment for your equipment to providing smart hands and industry leading interconnection services.

Los Angeles Location

Corporate Colocation Inc currently operates a "State of the Art Green Datacenter " in Downtown Los Angeles, at 530 West Sixth Street, Los Angeles, California with connectivity via Meet Me Rooms at 530 ,One Wilshire and Equinix providing connectivity and transit to more than three hundred carriers.

Ownership

A California Privately Held Corporation was established in 2000, Corporate Colocation is a pioneer in data center operations and network management. Corporate Colocation purchased Mzima Colocation in 2004 and has had a constant trajectory of growth since that time. With a small debt load Corporate Colocation offers "best of class," datacenters with personal and friendly support. Our clients are treated as valued friends and partners.
