# Youzzers : the anti-Facebook?

Youzzers is the first social network to offer effective security of users' personal data along with a multitude of services and features.

Steven Hori, a Swiss Internet and network specialist, is launching Youzzers, the first social network which is 100% secure and totally protects its members' personal data. Thus when an account is deleted, the totality of all personal data is deleted. Youzzers is also available on iPhone, Androïd and notebooks.

A network that provides a large range of features and services.

Youzzers is both a professional social network and an interactive one. It provides a wide range of features and services. All of these are regrouped on a single platform and are managed at will by the user. It offers a higher level of confidentiality in comparison to other competitors. Ergonomic, simplified and secure, Youzzers does not require any particular skills to be used.

E-learning
Youzzers offers a network to schools and universities which allows them to make their courses available online. The network users can take these courses starting from the modest sum of 1 to 2 €.

Safety Box
Directly incorporated into Youzzers, this function offers the storage of personal data which is protected by a security encryption ranging from 128 to 256 bits so that it is only accessible to the user himself.

Mailboxes
Youzzers allows one to create an e-mail address

my-email@youzzers.com

to send/receive e-mails to/from members and non-members. It allows a POP connection on additional mailboxes, the sending/receiving of mail by SMTP, all of which is protected by antispam and anti-virus.

Personal multimedia albums
Youzzers accepts all formats (Photos, Audio, Video, Documents) on a simplified interface for better management of albums. They can be configured to be visible or secured and are available on mobile phones and notebooks.

Live meeting (audio/video)

Youzzers also includes an instant messaging service with incorporated whiteboard. This system allows "multiusers" to work together with bridges to MSN, AIM, Yahoo, ICQ, software.

Presently, Youzzers is available in French, English, German, Italian, Portuguese and Spanish. Turkish, Dutch and Arabic will be available by May 15th along with other features.

Youzzers also provides news, e-commerce, creation and consultation of ads, forums and surveys.

The site is open: www.youzzers.com
