Revenue Management

Ensure the accuracy of your claims before you submit them. Medisoft V18 allows you to verify patient eligibility and use pre-claim editing to review your filings for errors on the front end. You can dramatically reduce the number of returned claims that cost your practice time and money.

The revenue management solution translates and displays electronic remittance advice (ERA) in an intuitive window. The biller can efficiently review payment information, flag changes and post individual payments and adjustments.

Billing

Customizable rules-based grids allow you to generate claims that quickly and easily meet the filing requirements of different carriers. With that level of flexibility, your practice can manage virtually any claim submission. Medisoft V18 includes numerous enhancements to comply with the new ANSI 5010 standards.

"Medisoft is delivering a night and day difference in practice productivity. Paper and manual processes are eliminated. Electronic access to patient information is driving better patient care."
