

FOR IMMEDIATE RELEASE

## **onShore Successfully Completes Service Organization Controls 2 (SOC 2) Type II Audit**

*Report shows that onShore's operational processes and controls meet high standards, without exception.*

**CHICAGO, ILLINOIS, November 18, 2013**—onShore Networks, a leading provider of computer network management services in the Chicagoland area, announced today that it has recently completed its Service Organization Controls 2 (SOC 2) Type II examination under AT Section 101, Attest Engagements (American Institute of Certified Public Accountants (AICPA), Professional Standards), for the period April 1, 2013, through September 30, 2013. The successful completion of this comprehensive audit demonstrates onShore's commitment to implementing processes and controls for delivery of high-quality services to its customers.

### **About SOC 2 Certification**

Completion of the SOC 2 Type II examination indicates that selected onShore processes, procedures, and controls have been formally evaluated and tested by an independent accounting and auditing firm. The examination included the company's controls related to the Trust Services Principles and Criteria of Security, Availability, and Confidentiality.

A SOC 2 examination is widely recognized, because it represents that a service organization has been through an evaluation of their control activities as they relate to the applicable Trust Services Principles and Criteria. A Type II report not only includes the service organization's system description, but also includes detailed testing of the design and operating effectiveness of the service organization's controls.

### **About onShore Networks**

onShore Networks specializes in designing, implementing, and managing local and wide area networks (LANs/WANs), delivering and managing systems running Microsoft Windows, Apple Mac OS X, or Linux Operating Systems, network security monitoring and management, and onsite technical support and internet connectivity (ISP) services. Their full-service Network Management offering includes 24/7 remote management and maintenance of the servers, workstations, and network equipment of their customers.

*"We are pleased to have once again achieved SOC 2 Type II compliance with no exceptions. The audit serves as proof of onShore's commitment to providing services that meet industry best practices," said Stel Valavanis, President.*
