The Fleet Genius Advantage

Affordable Fleet Management System

Prova Systems Fleet Genius Fleet Management System (FMS) provides cost-effective fleet management for fleets large and small.   The system's automated, wireless VHMs vehicle monitors collect vehicle performance data in real-time for use in fleet vehicle maintenance management, remote vehicle diagnostics and safe driver behavior monitoring.

Money and Time Saving Benefits

Implementing Fleet Genius offers many benefits to fleet owners and managers.   These cost-saving and labor saving benefits accrue to small business and large business fleets alike through improvements gained through fleet management automation and improved data accuracy.

Benefits include:

- **Reduce unscheduled vehicle downtime** through automated remote diagnostics;

- Achieve **just-in-time vehicle maintenance** saves money on unnecessary maintenance;

- **Protect your vehicle's engine** with remote diagnostics that alert you when a vehicle needs emergency check engine light and/or DTC servicing;

- **Reduce fuel expenses** caused by excessive engine idling and low fuel economy due to speeding;

- **Protect your vehicles** from aggressive employee drivers and speeders with behavior monitoring and potentially **reduce insurance liability insurance by up to 15%***

- **Avoid or cancel expensive cellular subscription** contracts required by GPS and AVL systems using Prova local wireless;

- **Preserve your existing fleet management software investment** by exporting fleet management data to your existing fleet maintenance system.

- **Simplify management oversight** through online availability letting you manage your fleet from anywhere , on any device 24 hours a day

* check with your insurance provider to see if an automated fleet management system with driver behavior monitoring can reduce

Fleet Genius's powerful local wireless capabilities eliminates the need for cellular subscriptions **slashing costs by $8-$12/ month per vehicle** for the average small business fleet.

60%
Savings

Over $35/month AVL and GPS systems

Fleet Genius **VHM vehicle monitors are designed and manufactured by Prova Systems in its USA factories.** This guarantees the best possible fleet management hardware at the most affordable price keeping Fleet Genius highly affordable.   With over 2 million road tested trip miles the system is highly reliable as well.

Reduce and control fuel costs

Reducing vehicle idle times can have a huge impact on a fleet's fuel expenses. One hour of idle time is roughly equivalent to burning 1 gallon of fuel (nearly 4 litres).

Monitoring and managing drivers who are repeatedly wasting fuel through high idling incidents can help reduce fuel costs. Fleet Genius VHMs and Fleet Genius software make managing and monitoring engine idle times easy.
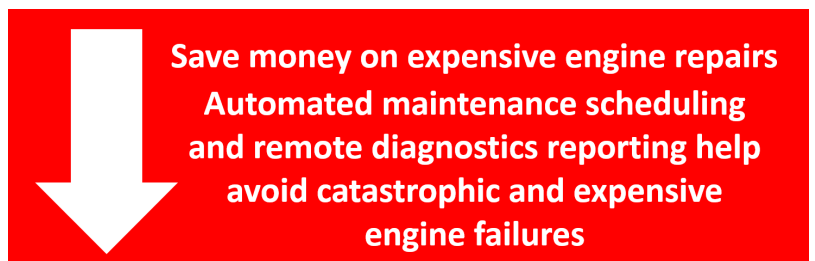

Reduce fuel costs by monitoring and reducing idling times

a 10%-15% reduction in idling can save big on fuel savings

Improve maintenance scheduling and failure detection

Simplifying and automating maintenance management is one way that Fleet Genius can save your fleet money.

The systems ability to report maintenance meters like miles, hours running time, days and hours of use fine tunes your maintenance activities.

Save money on expensive engine repairs Automated maintenance scheduling and remote diagnostics reporting help avoid catastrophic and expensive engine failures

Getting notifications of check engine light warnings and decodes of diagnostic trouble codes helps you react faster to potential engine failures.
