## Wenzel's Manufacturing Day 2016 provokes students' interest with insights into metrology.

**December 2016, Wixom, MI:**

Wenzel America, a leader in providing metrology and automotive styling solutions, provided another first: the first company to sponsor a Manufacturing Day<sup>SM</sup>

for 2016. Manufacturing Day is a celebration of modern manufacturing meant to shine the spotlight on 21st century manufacturing and inspire the next generation of manufacturers, and Wenzel did not disappoint.

At the event, 15 students experienced a hands-on view into the world of dimensional metrology and metrology principles, including how a CT system can scan a medical implant as well as teaching them about the language of GD&T.

"Until I went to manufacturing day at Wenzel, I wasn't even sure what a quality part inspection process really was, said one satisfied student. "Not only did it give me a better understanding of what is involved, it also gave me an appreciation for what metrology can offer me as a career path."

The event also give students a rare glimpse into how the balance of strength, accuracy and fluidity makes a CMM so good at what it does, insights they can incorporate when starting on their own unique journey into the metrology side of manufacturing.

**For more information about the event or the latest in Metrology equipment, call 248.295.4300 or visit our website at [wenzelamerica.com](http://wenzelamerica.com).**

### ABOUT WENZEL NORTH AMERICA

Wenzel is an innovative and flexible solver of customer problems build on a solid foundation of family, German precision engineering. Wenzel has become one of the main global suppliers of 3D Metrology, Gear Metrology, Styling Solutions, Optical

High Speed Scanning and Computed Tomography. We are large enough to support metrology and automotive styling customers all around while still focusing on those customers as individuals who require personalized and unique solutions.
