

About Eigen

Since 1995, Eigen Engineering, located in Bangalore, India has been producing precision metal stampings in all shapes, sizes and materials. We provide competitive pricing utilizing the latest technology in the metal stamping industry to provide top quality products with our state-of-the-art equipment.

Our workforce is highly trained and our equipment is updated to meet any requirement, this includes presses featuring accuracy within microns. From sheet metal precision stamping to carbon steel, brass, copper, and plastics, we work with any material you need, thickness starting from as low as **0.002"/0.05 mm** and even lower, up to as high as **0.19"/5mm** and even higher.

Eigen has a complete in-house tool room that can design, engineer and manufacture all types of **progressive, specialised multi cavity molds and**

prototyping tooling to meet your requirements. We also have **wire EDM** capabilities.

Eigen has competence in special processes such as **over molding and insert molding** .

Eigen provides wide array of contract assembly services – integrated solution to customers.

With our state of the art metal stamping equipment, unparalleled expertise, **competitive pricing** , and **JIT delivery** of your metal stampings, we are the best precision metal stamping company for your production needs.

Eigen is ISO/TS16949, ISO AS 9100 C and ISO 14001 certified.

VISION

To become a reputed mega enterprise in the engineering sector through business excellence while upholding the ethics and core values for the benefit of stakeholders at large.

MISSION

To be a reliable, preferred global solution provider and supplier to customers in the different segments of precision engineering industry by efficiently developing, nurturing and leveraging the capabilities and technologies.
