**The Humanity Party®,  
in collaboration with a Marvelous Work and a Wonder®,  
Publishes Memorandum Challenging Humanitarian and Missionary Efforts  
of the Church of Jesus Christ of Latter-day Saints (Mormon Church)**

SALT LAKE CITY, Utah – May 25, 2018 – [The Humanity Party®](#), a newly established American political party (est. 2015), has published a profound and well-researched Memorandum challenging the humanitarian and missionary efforts of the LDS/Mormon Church. “Worldwide religious charities and NGOs are destroying the local economies and making life worse for the poor that these organizations are trying to help,” said Humanity Party® spokesperson, Christopher Nemelka. “No one’s taken any initiative to point out **how charitable organizations ignorantly exacerbate poverty**, so we thought we’d take the issue directly to the wealthiest and most conservative church, per capita, in the world: the Mormon Church.”

The Memorandum also gives a brief summary of the origins of the Book of Mormon from a completely new and innovative point of view. Nemelka, also the Messenger for the Marvelous Work and a Wonder®, points out, “The Mormon people have what they claim to be a companion to the Bible: their Book of Mormon. Yet Mormons do not teach their members, or preach to potential converts, **the true purpose of the Book of Mormon, which was originally meant to help the native American peoples of both North and South America**, both economically and spiritually.” The Memorandum disputes LDS doctrine and demonstrates various religious practices that Nemelka says are “very hypocritical and a detriment to the fight against poverty and inequality.”

On Monday, May 28, 2018 (Memorial Day), at 12:00 PM, Nemelka will give an official statement about the Memorandum at the Salt Lake City Cemetery, near the Mormon Church’s most prolific memorial: the Hyrum Smith Monument. The statement will be given at the SW quadrant, PARK\_14\_8\_5E ([headstone location](#)). See map at [this link](#).

The Memorandum can be viewed and downloaded at the [link here](#).
