What can you do with GeneXus?

Mobilize

Bring your current systems to the mobile devices of your workforce and clients.

Extend

Extend your business processes and data to a wider audience in your markets and communities.

Adapt

Implement new functionalities in your existing systems and respond to evolving business needs.

Integrate

Integrate different systems (SAP, non-SAP systems, APIs, ERPs and more) into a unique software solution.

Leverage Investments

Evolve without losing your large previous investments in your business software systems.

Migrate

Move from one platform to another without missing a bit of information or functionalities.
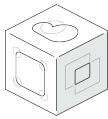

Modernize

Transition from old technologies to newer ones, while running operations.
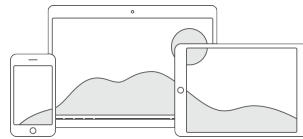

Data

Cross data across SAP modules and non-SAP systems, aggregating data and creating solid reports.

## The Enterprise Application Development Holy Grail

Simplicity

Improve Time to Market, and development efficiency with GeneXus™ Solutions.

Efficiency

Generate apps for multiple platforms from a single Model and automatically maintain the Apps and DBs.

Innovation

Create elegant Enterprise Solutions that empower your organization to innovate quicker.

TECNISA

Mais construtora por m²

"The project, in which GeneXus was used to integrate legacy systems with SAP, achieved 82% reduction in time compared to the budgeted time for the project."

Agnaldo Pedroso, IT Coordinator at Tecnisa
