

FORTA[®]

CONCRETE FIBER

STRONGER LASTING™

WHAT'S NEW AT FORTA

NEW CONCRETE PRODUCTS!

The FORTA Concrete Fiber Division is expanding its product line to include a complete range of products designed to aid in the success and long-term durability of your project.

EXTEND-PRO™

Gives concrete contractors the ability to gain crucial additional working time when finishing concrete in hotter, drier environments or in drier mix situations.

CURE-PRO™

A modified acrylic polymer specifically designed for the protection and appearance of concrete. It can be used as both a cure and seal for new concrete as well as a sealer for cured concrete.

No matter what stage of the process you're in, FORTA has you covered from start to finish.

NEW PACKAGING OPTION!

FORTA Concrete Fiber is now available in new, more efficient bags. Benefits to this new packaging option include:

- EASY-TO-HANDLE
- WATER RESISTANT
- RECYCLABLE
- EASY-OPEN CUT-TOP
- OUTDOOR STORAGE DURABILITY
- DENSER CUBE FOR PALLETS
- MAXIMIZES FREIGHT AND STORAGE

We care about the you and the life of your project!
