

FORTA[®]
EXTEND-PRO[™]
 STRONGER LASTING[™]

EXTEND-PRO[™] FINISHING AID

Gain crucial additional working time when finishing concrete in hotter, drier environments or in drier mix situations.

WORK SMARTER—NOT HARDER

EXTENDS WORKABILITY

Specifically designed to extend and improve workability of concrete, EXTEND-PRO reduces the risk of premature setting - even in the harshest of climates. This modified topical additive makes for extended work time by increasing the surface cream without changing the water to cement ratio.

ADDED DURABILITY

By reducing surface permeability, EXTEND-PRO increases surface abrasion resistance. Additionally, by extending cure time and reducing surface evaporation, EXTEND-PRO is proven to mitigate the potential for slab curling, plastic shrinkage cracking, and other drying-related surface issues.

SAFE & EASY

FORTA's zero VOC formula is nonflammable—making storage, application, and cleanup safer and easier.

EXTEND YOUR WORK TIME

Finishing concrete doesn't have to be a race against the clock
