SmartBuyGlasses Announces Special Offer On Eyewear For Unused FSA & HSA Dollars

Wrentham, MA, December 23, 2021: [SmartBuyGlasses](https://www.smartbuyglasses.com) is running an offer of up to 80% savings on eyewear plus an extra 10% off frames until December 31, 2021- making it the ideal opportunity to purchase a spare pair of glasses or replace prescription sunglasses before the FSA & HSA dollars expire at year-end.

With Flexible Spending Accounts (FSAs) and Health Savings Accounts (HSAs), one can set their pre-tax income to pay for qualified medical expenses. An FSA allows workers to pay for healthcare costs with their pre-taxed income. According to the Internal Revenue Service (IRS), the maximum contribution to an FSA in 2021 is \$2,750 per qualified account. This limit will increase to \$2,850 in 2022.

On the other hand, an HSA is a tax-advantaged savings account that allows people to save on medical bills that their High Deductible Health Plans (HDHPs) don't reimburse. Owned by the employee, either the employee or employer funds the account. Most HDHP holders have the option of adding an HSA. The two usually are paired together. As of 2021, the maximum contribution for an HSA is \$3,600 and \$7,200 for a family. In 2022, these will increase to \$3,650 and \$7,300, respectively.

Depending on the provider, the account balance left over at the end of December 2021 won't carry over into 2022. It's good to familiarize oneself with what is eligible to claim under these accounts, as plans encompass a whole range of health-related products & services. Given that these plans include vision care benefits, FSA's and HSA's can cover eyewear expenses- including prescription eyewear, prescription sunglasses, and in some cases, non-prescription sunglasses.

The ongoing offer at SmartBuyGlasses presents itself as the right opportunity to purchase a second pair of [eyewear](#), [prescription sunglasses](#), or a pair of [non-prescription sunglasses](#). The code **EXTRA10** gives shoppers up to 80% off their favorite eyewear, plus an additional 10% off the frames. At checkout, shoppers can easily add their [FSA/HSA](#) card information as they would with any debit/credit card. If they don't have a card, they can check out using a regular credit card and get reimbursed directly from the FSA/HSA provider.

There's no stress with finding the right frame. SmartBuyGlasses takes the online eyewear shopping experience to another level with the latest digital tools:

- With the [3D Virtual Try-On](#), shoppers can try eyewear before buying them.
- Their cutting-edge [Prescription Lens Scanner](#) allows users who already have prescription eyeglasses to extract their prescription directly from their phone, anywhere and anytime.

All orders placed on SmartBuyGlasses get verified by their in-house opticians before getting dispatched, guaranteeing optical accuracy.
