

SUCCESS STORY

# Solidus Streamlines Processes with Unanet Financials & GovConPay

## CHALLENGES

- Spent a lot of time manually moving information between many disparate systems
- Had no system checks to identify discrepancies or data errors
- Did not receive an adequate level of customer service and were constantly put on hold
- Ran payroll and expenses separately on a bi-weekly basis
- Needed more integrated systems that would allow them to scale

*“We get a red flag if a pay rate is wrong, or a person is active in one system and not the other, which is really important to us to know what’s going on. For other companies considering Unanet and GovConPay together: it’s a no-brainer.”*

**- Corinne Scouten, Director of Finance,  
Solidus Technical Solutions LLC**

## ABOUT SOLIDUS TECHNICAL SOLUTIONS

Solidus Technical Solutions is a software and systems engineering and development contract personnel services firm – a Small, Woman and Veteran owned business.

Their strategic focus lies in collaborating with their partners, tactical talent acquisition and a commitment to consistent delivery, OCI risk avoidance and conservative overhead management.

Solidus' vision has always been based on a belief that if you take care of the people, the business will take care of itself.

## THE UNANET AND GOVCONPAY SOLUTION FOR SOLIDUS

Solidus implemented Unanet Financials and GovConPay to consolidate data from four systems to two and automate processes.

After implementation, Solidus:

- Saves time and manual effort with a more cohesive process
- Increased efficiency with a direct link between systems
- Runs bi-weekly payroll and expenses at the same time, leaving more time in the off-week for other work
- Receives daily error messages alerting admins to any data discrepancies between systems
- Manages time better with quick responses from customer service representatives
- Reduced risk of manual errors
- Easily ties out labor distribution reports between Unanet and GovConPay
- New hires can now electronically onboard and submit paperless W-4, I-9, direct deposit and other required documents
- Employees complete benefits open enrollment and ongoing management through online self-service

Unanet serves more than 2,000 businesses with its ERP software solutions purpose-built for professional service organizations. Unanet's software helps project-driven organizations reliably plan, track and manage projects, people and financials. Unanet's customer-centric culture means we strive to deliver insights with personal service.

GovConPay helps federal government contractors grow with outstanding service and a unified Payroll, Applicant Tracking/ Onboarding, HR, Benefits and Tax Management technology platform that seamlessly integrates with DCAA compliant, industry-specific ERP software, such as Deltek and Unanet. GovConPay is the first and only Payroll/HCM company wholly dedicated to serving government contractors. Learn more at [www.govconpay.com](http://www.govconpay.com).
